

Auxiliary Seminar Registration Form

Friday, March 23 8:00 AM - 3:00 PM

Cost Member/Nonmember ... \$275 (lunch included)

Select program below:

Auxiliary Seminar: Litigation Support Services for Building Envelope Experts

Kamran Farahmandpour, FRCI, RRC, REWC, RWC, RBEC, PE, FNAFE, CCS, CCCA, Building Technology Consultants, Inc., Arlington Heights, IL

Josh M. Leavitt, Much Shelist, PC, Chicago, IL

This auxiliary seminar is specifically designed for building envelope experts who provide litigation support services. It was developed by an experienced construction attorney who has litigated several building envelope-related cases and a building envelope expert with extensive experience in litigation support. Using case histories, the seminar will provide an overview of the construction litigation process and construction claim types. The presenters will discuss the stages of litigation, the role of an expert, how he or she can make or break a case, and the important attributes of a building envelope expert. The presenters will cover typical challenges facing building envelope experts, such as document management and attribution of damages. They will also cover the "do's" and "don'ts" of testifying in various venues.

Auxiliary Seminar: Stucco and Exterior Finish Cladding Systems

Patricia M. Aguirre, REWC, PE, Bristow, VA

Richard L. Cook, Jr., FRCI, RBEC, RRC, RWC, REWC, RRO, CCS & LEED AP, CSRP, SC ACEM, ADC Engineering, Inc., Hanahan, SC

James I. Daniel, REWC, PE, Daniel Building Investigations, Inc., Lemont, IL

The Stucco and Exterior Finish Cladding Systems course is the second specific exterior wall course that builds on the fundamentals presented in RCI's Exterior Walls and Science educational program. This shortened one-day course will provide essential information on material properties, design principles, evaluation techniques, and repair methods for stucco and EIFS. Topics covered in this course include the various codes and standards that influence design, installation of stucco and EIFS systems, serviceability requirements, performance test methods, and case histories relative to stucco and EIFS assemblies. This abbreviated course is recommended for those who have taken Exterior Walls Technology and Science and want to further expand their knowledge of exterior wall systems. It will also serve as a good review course for those interested in taking the Registered Exterior Wall Consultant (REWC) exam.

These Auxiliary Seminars offer double RCI CEHs (12). AIA LU/HSW (6).
