RCI, Inc. Expands to Offer U.S. and Canadian Building Envelope Technology Symposia in 2018

Both Programs Offer Expert-Led Education for Building Enclosure Designers

Raleigh, NC – For more than 20 years RCI, Inc. has annual hosted an annual symposium on building envelope design technology. In 2018, the association will offer two such events. The first will be held in Mississauga, Ontario, Canada on September 13-14. The second event will be offered November 16-17, 2018, at the Gaylord Opryland Resort and Convention Center in Nashville, Tennessee, U.S.A.

Each two-day symposium features 12 unique educational sessions presented by leading building envelope design consultants. Speakers offer experience-based insights for the specification of sound, durable exterior envelopes. Most programs focus on repair and sustainable design methods for strengthening and improving existing structures.

Leading building envelope product manufacturers will be present with displays of the latest products and services.

Both programs offer continuing education credits from RCI. The Tennessee-located program also offers American Institute of Architects Learning Units.

For more information, visit rci-online.org or call 800-828-1902.

RCI is an international association of building envelope consultants whose members specialize in design, investigation, repair, and management of roofing, exterior wall, and waterproofing systems. RCI regularly hosts education programs designed to demystify and explain the application of roofing, waterproofing, and exterior wall technologies.
